

# Matrimony Hub – Subscription Page Documentation

---

## 1. Project Overview

Matrimony Hub is an online matrimonial website that connects individuals seeking life partners. This documentation covers the design and frontend development of the Subscription Plans page, which allows users to choose from three membership tiers with varying benefits.

## 2. Objective

To provide users with clear, attractive, and informative subscription options to help them choose a suitable membership plan for enhanced features like unlimited profile views, contact options, and direct messaging.

## 3. Plans Included

Plan Name	Price	Key Features
Basic	₹0	View 10 profiles/day, limited filters, basic support
Premium	₹499/month	Unlimited profile views, contact 10 profiles/month, priority support
Elite VIP	₹999/month	Direct chat, profile boost, match priority algorithm

## 4. Technologies Used

- HTML5 – Page structure and content.
- CSS3 – Styling and layout.
- Tailwind CSS – Utility-first styling approach (optional).
- Figma – UI design and wireframing.

## 5. Folder Structure

MatrimonySubscription/  
├── index.html  
├── style.css

└─ assets/  
└─ design.fig (Figma design)

## 6. UI Design Explanation

- Header: Branding and navigation (Home, Login, Register).
- Intro Section: Title and subtitle encouraging users to upgrade.
- Plan Cards:
  - Visually separated.
  - Responsive grid layout.
  - Highlighted CTAs ("Buy Now", "Get Started").
- Footer: Branding and copyright.

## 7. Responsiveness

Grid layout ensures compatibility with desktop and tablet views.  
Clean font hierarchy and padding for better readability.

## 8. Future Enhancements

- Backend integration with payment gateway.
- Authentication system to track subscribed users.
- Animation and interaction (e.g., plan selection highlighting).
- Plan customization for users.
