MatchMate Feed Page Documentation

Page Title:

Feed Page - MatchMate Matrimonial Web App

Objective:

To design and describe the functionality of the Feed Page of the MatchMate matrimonial platform, where users browse potential matches.

Section Overview:

1. Introduction

The Feed Page is the core discovery screen where users can explore profile cards of other members based on filters like 'All', 'Nearby', and 'Verified'. This page promotes engagement through a visually appealing layout and interactive actions like liking or messaging.

2. Page Features

- Profile Card layout

- Navigation bar (Home, Matches, Messages, Profile)

- Filter Tabs: All Profiles, Nearby, Verified

- Interactive buttons (Like, Message)

- Profile info: name, age, location, job, education, preferences

- Interests section with tag design

- Verified badge for authenticated users

3. UI/UX Design Elements

- Gradient background (Purple and Pink tones)

- Modern rounded cards with shadows

- Soft color palettes for readability

- Hover animations on buttons and cards

- Icons with labels to enhance readability

4. Structure of a Profile Card

- **Name & Age**: Prominently displayed

- **Location**: Subtext under name

- **Quote**: Personal expression by user

- **Details**:

    - Job title and company

- Education background
- Height and dietary preferences

- **Interest Tags**: Rounded pastel badges (e.g., Hiking, Cooking)
- **Action Buttons**: Heart icon (Like) and Message icon (Chat)

5. Example Filter Tabs

- **All Profiles**: Full list of visible users
- **Nearby**: Uses location data to show local users
- **Verified**: Filters users with the verified badge

Feed Page Sitemap

```
Feed
├── Filter Tabs
│    ├── All Profiles
│    ├── Nearby
│    └── Verified
├── Profile Cards (Grid Layout)
│    ├── Profile Picture
│    ├── Basic Info
│    ├── Tags
│    └── Buttons
└── Navigation Bar (Fixed Top)
```
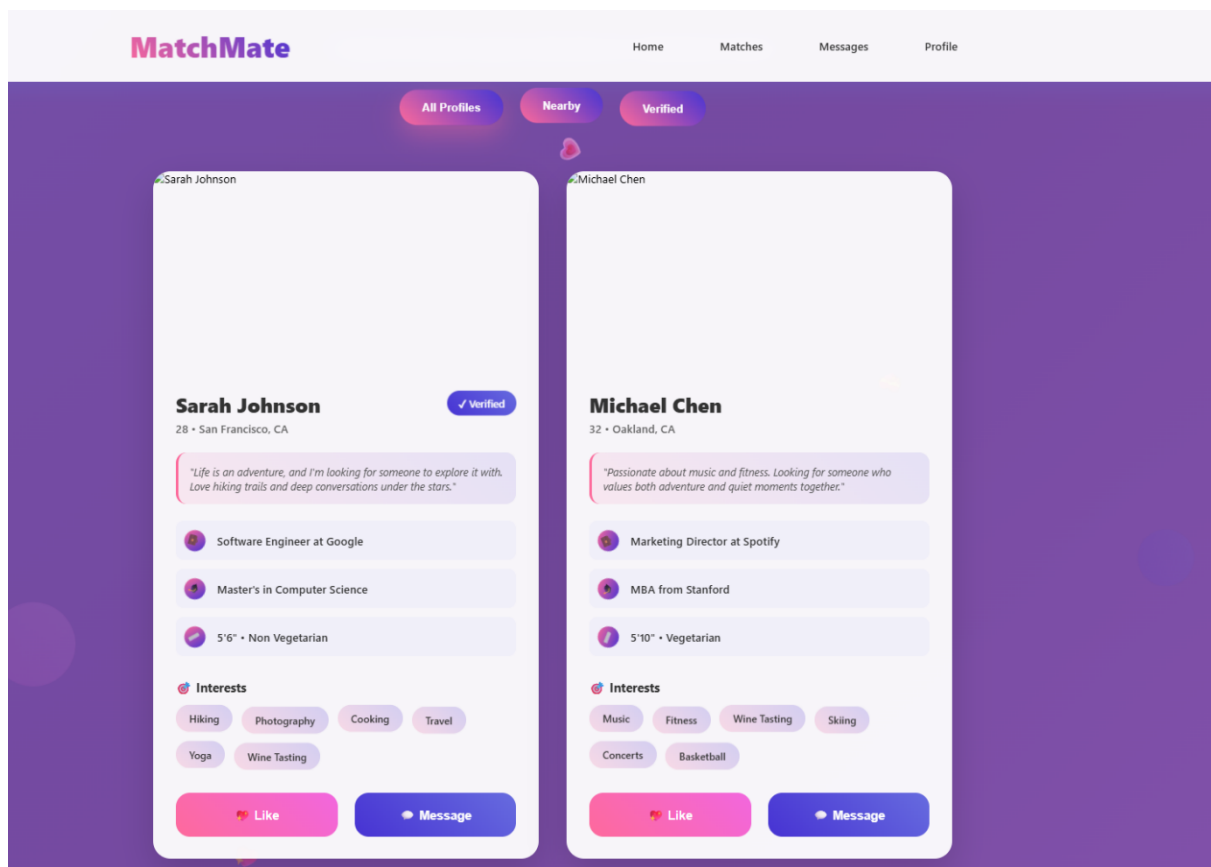

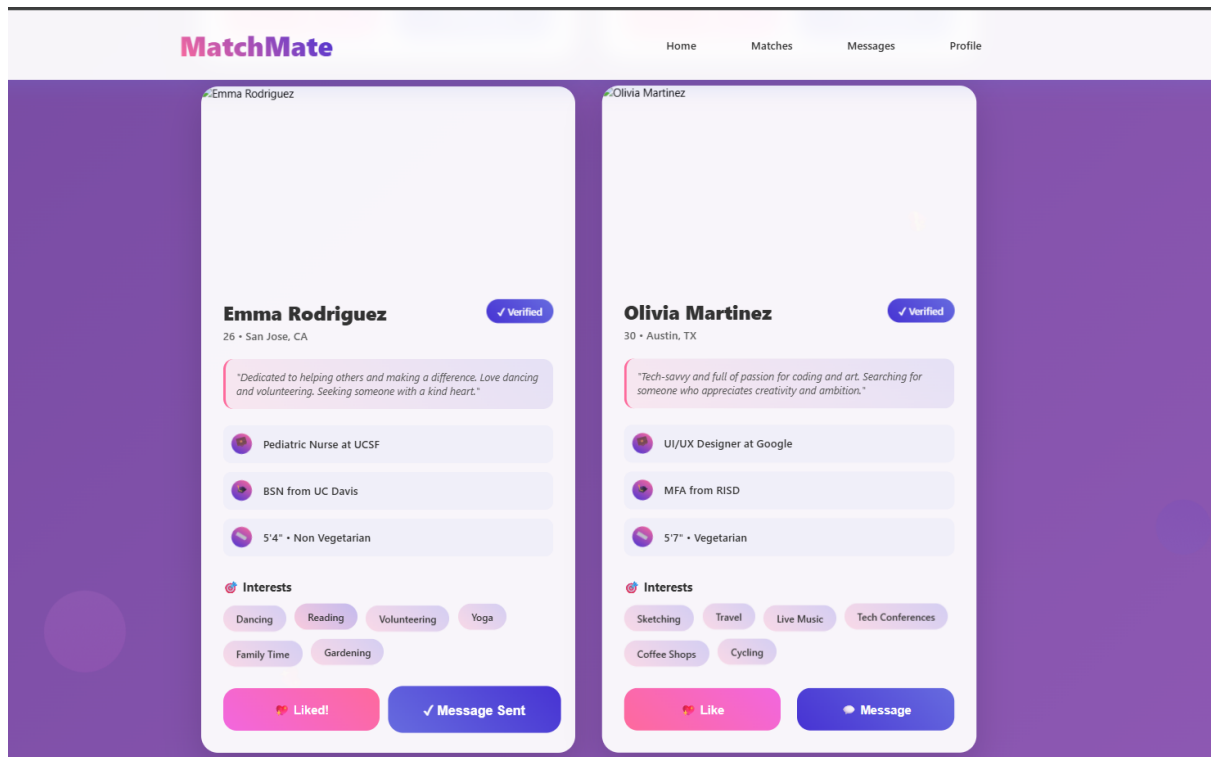

Page Goal

To allow users to browse multiple potential matches in an aesthetically pleasing and intuitive layout that encourages meaningful connections through profile depth and interaction tools.
